

Energy Saving
made simple

Energy Guardian

An energy-saving solution for organisations

What is Energy Guardian?

Energy Guardian is a fully-managed smart-metering solution, designed to save organisations money by cutting their energy bill by an average of 20%. The service includes full data analysis and energy-saving recommendations, and is ideal for a wide range of private and public sector organisations.

For anyone affected by the CRC Energy Efficiency Scheme, Energy Guardian provides all the information required to satisfy their reporting commitments.

For smaller organisations as yet unaffected by the CRC legislation, Energy Guardian is a comprehensive tool that can be used to help identify areas of energy waste within an establishment. Steps are then recommended to eliminate energy wastage and reduce energy spend, whilst promoting the organisation's green credentials.

Who is Energy Guardian for?

Because of the ease with which Energy Guardian can be scaled, the service effectively meets the energy management and reporting needs of a variety of organisations who are medium to large users of energy. Energy Guardian could cut your energy bill by 10 - 40% depending upon your current energy management practices.

Energy Guardian has been successfully proven in a number of high-profile companies and organisations, including representatives from the following sectors: automotive industry, councils, data centres, distribution centres, education, financial & legal services, healthcare, hotels, housing associations, manufacturing, the public sector and retail.

6 Reasons to Invest in Energy Guardian

1. Energy Guardian is a fully-managed service that makes it easy for you to cut energy bills and reduce carbon emissions.
2. Enistic energy coaches make sense of the data collected and provide you with easy-to-read reports, practical advice and tailor-made recommendations. There is no need for you to free up hours of valuable staff time to interpret your data.
3. Energy Guardian can be installed within a day, and without interruption to your business operations.
4. Energy Guardian enables you to display your energy consumption and progress towards savings targets in real-time, thereby helping to promote your green credentials.
5. Energy Guardian is competitively priced to provide a typical R.O.I. of less than 12 months.
6. Active Energy Management - this means you can control (switch off/on) some electrical devices from a PC or smart phone.

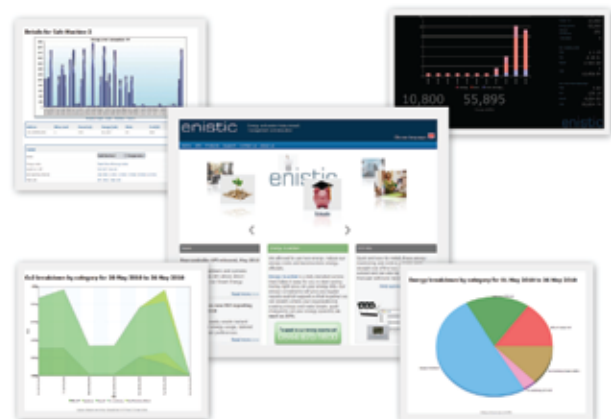

How does Energy Guardian work?

Energy Guardian uses wireless technology to pass readings from each meter back to the centralised reporting tool. This central management system, the Enistic Energy Manager, is hosted online within our secure class-one data centre. It can be accessed via an Internet browser, meaning that you have no software to install.

What's included in Energy Guardian?

- Enough hardware to accurately monitor and report on your site's energy usage, focussing on three modules: air conditioning/heating, lighting & general
- Access to Energy Manager Online where you can view information and create customised reports
- Regular energy management consultancy designed to maximise your energy savings and decrease the payback period.
